SOLID WASTE MANAGEMENT

1st September, 2020 @ 10.15 AM

Sri. Suresh Itnal KAS
Hon'ble Commissioner
Hubballi-Dharwad Municipal Corporation

Solid waste management includes the activities and actions required to manage waste from its generation to its final disposal. This includes the collection, transport, treatment and disposal of waste, together with monitoring and regulation of the waste management process. The sources of solid waste include residential, commercial, institutional, and industrial activities. Certain types of wastes that cause immediate danger to exposed individuals or environments are classified as hazardous. All non-hazardous solid waste from a community that requires collection and transport to a processing or disposal site is called refuse or municipal solid waste (MSW). Refuse includes garbage and rubbish. Garbage is mostly decomposable food waste; rubbish is mostly dry material such as glass, paper, cloth, or wood. Garbage is highly decomposable, whereas rubbish is not. Trash is rubbish that includes bulky items such as old refrigerators, couches, or large tree stumps. Trash requires special collection and handling. Many communities now conduct source separation and recycling programs, in which home owners and businesses separate recyclable materials from garbage and place them in separate containers for collection. In addition, some communities have drop-off centers where residents can bring recyclables.

Waste to Wealth
Dr. Ravi Guttal
Director, CIPD
KLE Technological University
BVB Campus, Hubballi

SPEAKERS

Sustainable Solid Waste Management through Energy Conversion Process
Dr. S. Kamaraj
Director
International Institute of Renewable Energy, Coimbatore

Team Leader
Dr. Mahadev B. Chetti
Hon'ble Vice Chancellor

Who can participate?
Under-graduate and Post-graduate students and Faculty from SAUs and other Universities

Certificates issued for participants who register, attend and submit feedback form.
Participants can register using the link
