

UNIVERSITY OF AGRICULTURAL SCIENCES, DHARWAD
ICAR - NAHEP - IDP Workshop on

Start-up Opportunities in Hi-Tech Vegetable Production

13 October 2020

@ 10.00 AM to 5.00 PM

Horticulture is attaining pride status in the field of modern agriculture. Hi-Tech production of horticulture crops adopting modern technology is need of the day to increase the productivity and quality of the produce. Vegetables are one of the most important components of human diet and are rich source of vitamins and minerals which have important role in human health and are also called as "Protective Food." There is an immense scope for vegetable production for export to Europe and Middle East countries besides domestic need. There is an immense scope for the entrepreneurs to come forward and establish large scale Hi-Tech Vegetable Production. Hence, this programme will help progressive farmers, youngsters and educated unemployed youth to take up this entrepreneurship as a profitable venture.

Team Leader
